Subject: Red and Bonita Mine Bulkhead and April Mtg

Peter,

The days have gotten away from me in terms of returning your call. So, I wanted to send a quick note, but I am happy to talk next week if you would like to discuss this more. In short, the following updates are provided in answer to your voicemail questions:

1. Red and Bonita bulkhead planning is underway and we have budgeted that work for this year.
2. The bulkhead design includes a piping component to allow for potential future injection of insitu treatment reagents.
3. Gold King Mine adit rehab work is also scheduled for this year. I have discussed this with Todd Hennis also.
4. I do not have plans to attend the April 28th ARSG meeting, but Allen Sorenson, DRMS and I have set aside the time in May to attend the ARSG meeting and go over the design and plans for the R n B, etc.

Please let me know the date for the May ARSG meeting. If you would like to discuss this further, please let me know a time next week that I could call you.

Sincerely,

Steve
